Project Overview

A. Project Description

The College of Architecture and Environmental Design (CAED) is nationally recognized, and a signature program housed in the John Elliot Center for Architecture and Environmental Design. A new satellite facility is proposed supporting CAED's sustained enrollment growth in a location providing student studio space, fabrication space, research, and technology needed for student success as they continue to outgrow their current facilities pushing undergraduate classes, graduate research, and faculty offices to temporary locations scattered across campus to meet the demand for space.

This project's solution provides 150 – 200 additional studio desks in an adaptive re-use of an existing university building which originally housed a dining facility and culinary services bakery within its commercial kitchen. During the Kent Campus Masterplan authored in 2017 and previous contracts with food service providers, the kitchen was earmarked for closure as space data showed need for consolidation of operations and food services. The space proposed for renovation is currently being utilized for Residence Hall warehouse storage and is better suited to support academic demands with its large open floor plate in keeping CAED's pedagogical studio model and anticipated growth for the next 5-7 years. The proposed second-floor project footprint is 21,925 square feet.

B. Scope of Services

The selected A/E, as a portion of its required Scope of Services and prior to submitting its proposals, will discuss and clarify with the Owner and/or the Contracting Authority, the cost breakdown of the Architect/Engineer Agreement detailed cost components to address the Owner's project requirements. Participate in the Encouraging Diversity, Growth & Equity (EDGE) Program as required by statute and the Agreement.

As required by the Agreement, and as properly authorized, provide the following categories of services: Schematic Design, Design Development, Construction Document Preparation, Bid and Award Support, Conformed Documents, Construction Administration, Post-Construction, and Additional Services of all types. The program is currently being finalized by the Office of the University Architect and CAED. Program Verification will not be a required phase. Construction Notice to Proceed assumes receiving bids in early May 2023 followed by the Controlling Board approval process.

Refer to the *Ohio Facilities Construction Manual* for additional information about the type and extent of services required for each. A copy of the standard Agreement can be obtained at the OFCC website at <https://ofcc.ohio.gov>.
