

MRC

M. RIVERA CONSTRUCTION, CO.

Capability Statement

Established in 1992, **M. Rivera Construction Company** (MRC) is a Cleveland-based MBE, FBE, WBE, SBE, EDGE Certified company offering selective and structural demolition services, as well as providing supplemental Union labor to contractors in Northeast Ohio. Over the last three decades, **MRC** has earned a reputation in the industry for delivering high quality work in a timely, safe, and cost-effective manner.

MRC employs Union crews with integrity and years of experience in the construction industry. **MRC** has a strong reputation for employing, cultivating, and promoting minority personnel within its ranks. **MRC** has a history of working with local Cleveland Unions that it hires from to provide opportunities for new and upcoming workers from diverse backgrounds. **MRC** is an equal opportunity employer who strives to further minority, female, Cleveland, Cuyahoga, and low-income residents; as it has on previous high-profile Cleveland and Cuyahoga county projects.

MetroHealth Campus Transformation

Rocket Mortgage Field House

◀ **MetroHealth Medical Center - 19 Operating Rooms / Hybrid Operating Room Demolition** *Regency Construction Services, Inc.*

The complexity of this project was performing demolition above an active Level One Trauma Center. Working closely with the General Contractor to ensure that doctors and patients were not disturbed in the adjacent operating rooms or the ER below. The General Contractors planning and coordination with MRC and the various other Trades is what made this six-month-long project a success.

◀ **Lorain County Metroparks Oberlin Splash Zone - Total Roof Demolition Over Pool** *Town Center Construction.*

The Splash Zone was a complete tear off of a metal roofing system, insulation, and tectum panels. MRC performed this above a swimming pool and adjacent to an outdoor pool occupied with the general public less than 20' away.

► **Olmsted High School Selective Structural Shoring & Demolition** *Turner Construction.* *This project required the structural shoring of various portions of the building, including the gymnasium to saw cut and remove portions of the structure to create a tie in point for the multiple new additions for the expansion of the school. Interior selective demolition was also performed throughout the school many times when the school was occupied.*
